DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see After Final Amendment, filed 8/17/04, with respect to claims 16-27 have been fully considered and are persuasive. The rejection of claims 16-27 has been withdrawn.

Reasons for Allowance

2. Claims 16-27 are allowed over the prior art of record. Claims 16-27 are renumbered as 1-12 respectively.

The following is an Examiner's Statement for Reasons for Allowance: The prior art neither teaches or suggest the combination of: applying a first image-processing operation to said character image data by employing a first LUT for converting image values of pixels, represented by said character image data to first exposure control values, so as to generate revised character-image data, which represent said first exposure control values; applying a second image-processing operation to said pictorial image data by employing a second LUT for converting image values of pixels, represented by said pictorial-image data, to second exposure control values, so as to generate revised pictorial-image data, which represent said second exposure control values; combining said revised character-image data with said revised pictorial-image data, so as to generate processed image data, which include both said revised character-image data and said revised pictorial-image data; and forming an output image on said photosensitive material, based on said processed image data, so as to produce said print.
